NUMBER 5.

H. L. Seamans Talks On Grasshoppers

The regular Board of Trade meeting was held Monday night last in the Town Hall, when over forty were present to listen to the splendid talk by H. L. Seamans, Entomologist from Lethbridge, on the Grasshopper situation in Alberta and particularly in this district.

Mr. Seamans stated that he and the Laboratory staff had covered the field pretty well, that there were two areas of severe infestation, one centering on Drumheller, and the other one on Lethbridge. In the north said the speaker, they will have a much worse infestation than last year, while ours will be just about the same. He spoke of the different types of hoppers, and stated that it was the Lesser Migratory Locust that was giving us our trouble, and that this species preferred stubble land in preference to any other place for the laying of their eggs and their incubation. They were also the most difficult to poison, as they always spread out so much. The old-time roadside hopper were always found in bunches, mostly on grass land and could be poisoned without much trouble. The lesser migratory locust ordinarily lays about 120 eggs per year per pair, and disease, flies, and other natural means destroys about 118 of these 120 so the population remains about the same. But, in hot, dry years like we had last year, a female may lay as many 500 eggs, and the difference between 118 to be destroyed and 498 to be destroyed represents our problem, and a continuation of this abnormal egg-laying for a few years gives us our periods of severe infestation. A cold, wet spring, particularly just after the eggs are hatched, would help greatly in killing hoppers. Deep spring plowing with a moldboard plow, shallow cultivation of infested areas to bring eggs to the top were methods that could be used, but poisoned bait was the method that had to be relied on to route the invaders.

Speaking of bait, the speaker stated that tests had been extensively carried on last fall with an oil mixed bait, using sodium fluo silicate instead of arsenite for poison. This poison while a little more expensive as to first cost, would last so much longer, and so much more effective in results, that in the long run it would be far more economical than the present bait used.

Because of not being entirely satisfied as yet with their tests however, the present campaign would open with the use of water bait, but if the oil mixture proved successful, they would change to that later on.

Considerable time was spent in questions and answers, and the farmers used Mr. Seamans knowledge of the hopper pest to find out all they could regarding the matter.

At the close of the meeting a hearty vote of thanks was tendered the speaker for his attendance, and the splendid talk he had given.

STUDENT GIVEN SIGNAL HONOR

MISS CHARLOTTE KNIGHT HEADS WOMEN STUDENTS' GROUP UTAH UNIVERSITY

Another Southern Alberta student has received signal honor in an American university. She is Miss Charlotte Knight, daughter of Mr. and Mrs. Raymond Knight, and attending the University of Utah at Salt Lake City. Miss Knight, one of the most popular girls on the university campus, has just been elected president of the Association of Women Students, the second highest honor that can be conferred on one of her sex at the university, the premier honor being election to the vice-presidency of the student-body council.

Miss Knight will hold office in her senior year, 1935, and will attend the national convention usually held in New York City.

Miss Knight, who is majoring in English branches, has a brilliant scholastic record at Utah University and has also been prominent in sorority and club circles. She was attached to the editorial staff of the "Utah Chronicle," university newspaper, for several years when during a visit of Paderewski, famous Polish pianist and statesman to Salt Lake City, she scooped all downtown dailies by obtaining an interview. A note of congratulations from the great virtuoso is one of Miss Knight's prized possessions.

Support the Local Golf Club

The local Golf Club asks for your support. A strong organization has been formed, and the Membership Committee has been busy for some time on the matter of memberships, and while they are meeting with good success, the response is not just all that the Club desires.

E. "Teddy" Wagstaffe, professional golfer of Waterton Park for several years past, is here now to take charge of the course, and to instruct players in improving their game, and we are informed that he is doing a great deal of work on the course, improving the greens, enlarging the fairways, and in every way making the course so that playing will be more pleasant, and better scores possible because of the improvements.

Give the Club your support if you play golf. And if you don't play, maybe you would enjoy learning. Now would be a good time to commence.

"Oliver Twist" playing next Mon. Capitol. Matinee at 4:15

A north wind Tuesday morning and a few flakes of snow made the weather look bad but the afternoon was bright and clear.

for better and bigger Stampede throughout Alberta

The Stampede was discussed briefly, and the Executive was left to work out the details regarding this yearly entertainment.

It was also planned to arrange something in the way of an appreciation for the Union Jacks victories in Basketball, and to Earl Bascom for the honor he brought to Raymond in winning third place in North America in steer decorating.

Details were left with the Executive.

Vancouver Trounces Union Jacks 46-31

Unleashing a scoring attack in the first few minutes of play that swept the Jacks from their moorings, the Vancouver "Province" team took the opener of the two out of three Dominion Playdowns series by a score 46-31 on the Opera House floor on Wednesday night. A good gallery of fans were on hand to watch the battle, and both teams received a hearty round of applause when the teams took the floor to commence warming up. The Jacks had just received their new deep green uniforms, and they looked very smart and perk in them.

In the preliminary between the High School and the Idlers, the Idlers came out on the long end of a 25-17 score after a game featured by snappy ball in some places, and rather listless playing in others.

The main game opened up slowly with both teams feeling each other out, and checking closely to prevent any surprise plays. Kirkham of the Jacks notched the first counter on a foul shot, but it was not long after this that Vancouver commenced pounding the bank, and hulking the hemp with painful regularity. The defence of the Jacks was demoralized, their shooting was far below par, and

the "Province" quint made every opportunity count. "Long that swept the Jacks from their moorings, the Vancouver check or stop, as our fellows found out to their sorrow and dismay. McIntyre and Kennington, the other two front end men of the visitors are also plenty fast, and make use of every break to bulge the twine for counters. The end of the first half found the score 28-14 for the visitors, a story that is painful to chronicle.

In the second stanza the Jacks were working better, and despite the fact that during the frame Rolison was ruled off for personals, the locals stayed with in one point of the Vancouver score getting 17 to 18 in this frame. The locals however say "we'll take 'em Friday night," and here's hoping they do.

Jerry Porter of Vancouver and Henry Viney of Lethbridge had the whistles. The lineup and score follows: VANCOUVER; Kennington, 9; McIntyre, 13; Purves, 18; MacDowell, 4; Armstrong; Bumstead, 2; Smith; Chatis; Helem; Will. Total 46.

RAYMOND; Kirkham, 4; O'Brien, 11; Fairbanks, 10; Nilsson; Rolison, 2; Nalder, 2; West, 2. Total 31.

Mr. and Mrs. Wm. Cooper spent Sunday here with Mr. and Mrs. Reg Cooper.

A Mighty Adult Theme now comes to the screen. "Damaged Lives." April 23rd and 24th.

Mr. and Mrs. O. H. Snow and Mrs. I. B. Roberts were Magrath visitors last Sunday.

Gardening is the order of the day, and Sweet Peas and other early flowers are already in.

Mrs. T. C. McBeath, of Calgary, has been visiting here for a few days with relatives and friends.

When a car turned over on the Macleod-Lethbridge highway Saturday afternoon, Viola Hagen, 18, of Staveland was killed. The other three occupants were shaken up but escaped serious injury.

Drags were out on all of the Town roads last week, and this has made a great improvement on them. They had been very rough and badly cut up.

Beet drilling is in full swing now, and there will likely be 12 drills running in this immediate district by Saturday night. The land is working up in fine shape and germination should be rapid and uniform.

The Vancouver "Province" team of Basketball players were the guests of honor at a complimentary luncheon in the Club and enjoyed by all at the conclusion of which toasts to the Town of Raymond were given by Mayor W. G. Meeks in the chair, the players of both teams, and the Board of Trade Executive officers present.

Mayor Meeks welcomed the visitors to the Town, and extended the freedom of it to them and hoped they would enjoy themselves. The visitors stood, and were named by the Mayor: Leech, a very enjoyable trip is reported.

Town Council Holds Very Busy Session

WEDDING BELLS

NEMETH — KOMOS

Joseph Nemeth of Warner, and Miss Helen Komos of Pasin, Hungary, were united in marriage at the United Church, Monday evening, April 9th at 6 p.m., at the United Church, Raymond, the Rev. H. D. Riggs performing the ceremony. The groom has been here for several years, but the bride has recently arrived from Hungary.

Following the ceremony a wedding supper, and social evening was held at the home of the groom's brother, Julius Nemeth, where a large crowd gathered to wish the young couple happiness and success in their married life.

FARMERS' ANNUAL LOSS FROM WEEDS IS

\$179,200,000

Special Study of Weed Control Financed by Elevator Owners — Pamphlets available at Elevators

Professors of Agricultural Colleges of the University of Manitoba specializing in weed control and eradication have made compilations indicating that loss to Western Canadian farmers through weed amounts to \$179,200,000 annually.

In order to provide farmers with information as to the best means of combating the weed menace, Dr. G. P. McRostie, Professor of Agronomy and W. Tildesley, assistant on weed research, approached the Northwest Grain Dealers' Association with a proposal that the line elevator companies finance scientific investigation concerning weed eradication. Recognizing the need for such a study of the weed problem, the elevator men undertook to raise the funds necessary for the survey.

According to the past three years and the results of investigations of Professors been turned over to the Northwest Grain Dealer. The studies relate to Couch Grass, Sow Thistle, Canada Thistle, control of weeds by chemicals and destruction of weed seeds by ensiling. The first of the pamphlets dealing with these subjects is now in the hands of all line country elevator agents for free distribution to farmers. Any farmer may now obtain the latest scientific information on this important subject at any local line elevator.

The quality of Canada's grain crops and profitable volume of production can only be obtained through control of weeds. Line elevator company owners are deserving of appreciation in recognizing the need for scientific study of this problem and the making available of the results of these experiments to the farmers of the West.

Orson Bigelow of Calgary was a Raymond visitor Thursday.

TRADE PRACTICE PUZZLE

"It's a queer thing that some of the companies with Ontario and Quebec canneries and also with B.C. canneries send the eastern goods to Vancouver by water to compete with the B.C. product turned out of their own plants. They take the attitude that it is every plant for itself. This does not seem to make sense but there it is," H. O. Weatherill, Bulmans Ltd., Vernon, B.C., says in Country Life in B.C.

The regular meeting of the Town Council was held Thursday night and the Mayor and Council were working until after midnight with the problems of the Town.

Several delegations were present, among which were O. R. Knight and S. I. May from the Board of Trade asking the Council to fix up the Stampede Grounds for this year's show. A committee was appointed to go over the grounds and at a special meeting of the Council this matter will be decided on.

Mr. Cope was given the privilege of fencing the lot adjoining his home and keep it clear of stock and rubbish. He was also granted the privilege of protecting his trees with wire or lumber fence, there on the boulevard. He is also taking part of the nuisance ground to clear it off and plant it down to grass and trees, and will move all the junk on to the north part of the lot, thereby greatly improving the appearance of this eyesore on the main highway.

The impounding of stray stock will commence immediately and the law regarding this will be enforced to the letter, so everyone had better take care of their stock and keep it in.

Several other matters were taken under advisement, and the monthly bills passed and routine business disposed of.

Do not miss Lionel Barrymore in "ONE MAN'S JOURNEY" Capitol Friday and Saturday. Its perfect entertainment.

DID YOU EVER STOP TO THINK?

By Edson R. Waite,

The world is more populated than it ever has been. Humanity needs as much as it ever did. In fact, today we consider as necessities what were formerly regarded as luxuries. What is the cause of there now being a decreased demand when the natural tendency would seem to be exactly the opposite. More people require more supplies and the education of the people to a higher standard of living introduces a demand for more expensive goods. The cause is the reduced buying power of the people, and there seems to be a thousand schemes floating around to remedy that.

The two things which will do the most to restore confidence and to give capital a sense are deal so it will come out of hiding and go to work. In spite of what we may think of capital, it takes money to make the wheels of business go around. The fellows who have money are scared and won't put it to work until they are satisfied that it won't be taken away from them by taxes and they will have a chance to make a reasonable profit.

"The FIRESIDE PHILOSOPHER"

By ALFRED BIGGS

Lost love is rarely revived.

Love 100% pure is rare as radium.

Suspicion feeds jealousy, certainty starves it.

It is easier to hurt those who love us than those who do not.

We are more fooled by our own egotism than by flatterers.

We often get credit for good qualities by hiding our bad ones.

Those who boast of many friends are generally advertising their own virtues.

IS IT WORTHWHILE

Mr. and Mrs. Citizen of Raymond, is it worthwhile to have our Championship Union Jacks in the Dominion Playoffs? It takes nearly \$700 every time a team comes in from some other Province to play a Dominion playoff series, and every time the Jacks journey forth in quest of higher honors, some other Province has to foot a similar bill. Then on top of this there are the incidental expenses of each member of the team, which would add considerably to this amount. Now then, what are we getting out of it, and do you think it is worthwhile?

There are a great many things we could do with \$700. that may appear bigger, better, and wiser than what we are doing. But, we question it greatly. While we are interested in good buildings, good schools and the other elements of a high civilization and culture, our first and most important business is to build men, and there is no better way of building good sound, honest and upright men, than by fostering clean sport, and interesting our boys and men in participating in it. If we could spend \$700 every year in sponsoring such a series and assisting in moulding the character of only one or two boys for a higher type of citizenship, we would be doing something of more lasting benefit than a new block of paved streets each year, and how much better if these things influence the lives of many.

To attend the complimentary

limcheon on Thursday tendered the Vancouver boys and their accompanying friends, was to feel and appreciate the spirit of good fellowship that sport engenders in the ones who take part in it. The boys were mingling freely one with another, and while they are contesting for Basketball honors, and fighting to the last ditch in the game, still they are friends, and would do anything for each other and safeguard each other's interest in every way. That is sportsmanship for you, that is the thing that makes men, and if we never do anything else than have our young men mingling with other young men in this spirit of sportsmanship and good will, it is our opinion that we are making a safe and sound investment that would yield us splendid dividends.

Those who are active in sports, generally, are above the small things that tend to cheapen citizenship and destroy manhood. Support the boys by your presence at the Playdowns and invest in REAL wealth.

News Notes

Maurice Cooper spent the past week in Cardston helping his brother Will with his work there.

Mrs. J. H. Reid spent Wednesday with Mr. and Mrs. S. I. May and family and took the train from Lethbridge Wednesday evening for her home in Calgary.

Client: "I want to see some responsible person."

Office Boy (under notice): "Then have a look at me, sir. I'm generally blamed for most things wot goes wrong here."

What About Social Credit in Canada?

This series is an explanation of the Douglas Social Credit Plan. Mr. Williams, (W.) a Social Credit advocate, is explaining the plan to his friend, Mr. Jones (J.). The scene is Mr. Williams' home, and the conversation takes place during an evening visit.

By following this series to the conclusion the reader will clearly understand the problem which faces Canada.

NUMBER 9

Authors note:

We are aware that Canadian banks do not lend on real estate but we used the term "house" in order to simplify the illustration. The same effect results from the construction of a factory that is financed by public subscription to a bond issue.

W. "I want you to see the situation clearly; that neither interest (which some people call "usury"), nor dividends, nor the land monopoly are concerned in the problem. People who concentrate on these superficial points are overlooking the real problem. The main point to note is that the wages paid for making these furs are less than the price we should have to charge for them if we are to remain solvent. For, as you have admitted, it is absolutely necessary for us to add an amount, large or small, to the cost of the furs before they are sold, and this amount is added to allow for replacement of capital equipment.

But here is the extension of that illustration. Suppose Joe Black, instead of repaying his loan, had taken the money we paid him for the first house and invited us to build another under the same conditions. And suppose that we went on just as before and built a house in our spare time, saving all the money he paid us in wages. Now he again offers to sell us the house and we pay him five thousand dollars. Assume that it is not necessary for him to repay the bank; we immediately use that money to consider that the community still has \$5000. Now we start working the fur business, and acting a manager at one house and I at the other but we remain partners. There is \$10,000 in prices represented by the cost of these two houses that must be recovered in addition to any other cost of our product. But there is only \$5000 in the community to meet it. How can we get \$10,000 from a community that has only \$5,000?"

J. "I don't know. How do we?"

W. "We don't! The end is stacked against us. And all businesses today have to try to beat this insurmountable handicap. If we succeed it is only at the expense of another producer who gets bankrupt because we are lucky enough to receive the purchasing power HE has distributed. Or we succeed because by reason of export credits we are able to export the surplus which the

home market cannot buy. We will take up this export business later."

J. "This looks pretty hopeless. I can't figure out how industry has kept going."

W. "I will take that up in a minute. But before going on I want to point out that this is not the whole story of the flaw. There are contributing factors."

J. "What, — more?"

W. "Yes, consider 'saving.' Now we are brought up to consider saving as a virtue and while children we have the habit of thriftiness inculcated in us. But today saving is a vice. The paradox is that he who does not save in his own country but a friend to the community, while the man who saves is certainly benefitting himself by protecting himself, but he is injuring the community by withholding needed purchasing power."

J. "How do you make that out?"

W. "Well, we have discussed the question sufficiently for you to have grasped the fact that the only money available to purchase any object is that which is distributed during the production of that object. If part of the money is withheld then part of the production cannot be sold."

J. "But if a man saves money in order to buy a house—what about that?"

W. "That's all right if it is eventually spent for something which he is going to consume or use for personal use even if the purchasing power is not available for a long period. But what frequently happens is that the money is invested in some line of production before it has functioned as purchasing power for consumer's goods."

J. "Well, what is the effect of this?"

W. "The same situation arises as we saw existed after the house had been built. There will be a shortage of purchasing power."

J. "How?"

W. "Suppose a man is paid a certain sum of money for making hats. Each week he saves \$5 out of this amount. At the end of twenty weeks he has \$100 which he lends to a farmer for use as liquid capital in his business. The farmer or busy supplies with it and keep at least \$80 for the next year will have to include this \$100 of costs. Now, the community has \$100 and it could use it either to buy the \$100 worth of hats left unsold by reason of the workman's saving, or else it could repay the farmer

Boy: "Well, sir, somebody rang up and said 'Is that you, you old idiot?'"

THE CULTURE OF STRAWBERRIES ON THE PRAIRIES

(Experimental Farms Note)

The strawberry is not grown as extensively as it should be on the prairies. This is probably due to the inexperience of the people in general rather than to impossibility of the production of fruit. Strawberries will grow and produce abundantly provided the right varieties are planted and the recognized cultural treatments are followed.

Senator Dunlop is recognized as one of the best varieties of June-bearing sorts for our climate. Premier, Easy Picker, Marvel and Glen Mary are other good sorts. Mastodon and Champion are two good ever-bearing sorts and are worthy a place in any garden.

At the Dominion Experimental Farm at Indian Head it has been found that spring planting has given greater satisfaction than fall planting. It is very essential that the plantation be surrounded by a shelterbelt to give the needed protection from soil drifting and drying winds. The soil should be well prepared, preferably summer-fallowed, with a heavy application of well rotted manure incorporated. Plants should not be set in long that contain patches of quick grass or thistles as they will not thrive. Setting the plants 18 to 24 inches apart in rows 4 feet apart seems to give best results, care being taken to keep the crown level with the surface of the ground. If the weather is dry

by purchasing his product. But it cannot buy both the farmer's product and the hats."

J. "Why not?"

W. "Because there are \$200 of 'costs' standing against the community and only \$100 in purchasing power."

J. "But the community could buy the hats and then the hat manufacturer could buy the farmer's product and so the hats would be sold, the hat manufacturer would recover his costs and the farmer would receive his costs so—"

W. "Everything would be rosy—"

J. "I don't think! Snap out of it! Does a business live on its capital. Don't you realize that out of the \$100 the hat manufacturer received he would have to keep at least \$80 for the next cycle of production? If he spent the whole of the \$100 on the farmer's product, how would he finance his next period of hat manufacturing? You can't use capital for personal expenses."

J. "No, I suppose you can't."

NOW EATS ANY KIND OF FOOD, AND NO CONSTIPATION

Mr. Durigan Finds Relief in Kellogg's ALL-BRAN

Here is his enthusiastic letter: "Am 70 years of age, and for 40 of these years there never was a week but what I had to take a pill or some kind of cathartic."

"I took everything, but gained only temporary relief. Until last spring my daughter, who is a nurse in a hospital, brought me some Kellogg's ALL-BRAN."

"At the end of the week, I knew I had something that was it, and I kept on taking it. I haven't taken a cathartic since. I can eat meat any time, as often as I like, or any other kind of food, and no constipation."—Mr. L. M. Durigan (address furnished upon request).

Laboratory tests show Kellogg's ALL-BRAN provides "bulk" to exercise the intestines, and vitamin B to help muscle tone. Also iron for the blood.

The "bulk" in ALL-BRAN is much like that of lettuce. Inside the body, it forms a soft mass. Gently, it clears out the intestinal wastes.

How much safer than patent medicines. Two tablespoonfuls daily are usually sufficient. With each meal in serious cases. If not relieved this way, see your doctor.

Sold in the red-and-green package. At all grocers. Made by Kellogg in London, Ontario.

and hot at time of planting it is advantageous to give a light watering to prevent too much drying out before the plants become established.

Give frequent cultivations during the first summer to keep weeds in check and the soil in a good friable condition so that the runners when formed may have a well prepared resting medium. Use the hand hoe occasionally to eradicate weeds in the row and at this time the runners may be placed to form a well spaced matted row.

Fall preparations consist of mulching the plantation with about four inches of straw or hay after freeze-up has taken place. This is left on until mid-April to prevent the after late freezing and thawing so destructive to the plants.

Raymond are asked to have their Property
Cleaned up and Rubbish Removed,
or ready for Removal between now and

Tues., May 1st, 1934,

BY ORDER OF

E. S. HAWK,
CHIEF OF POLICE

to delay the early blooming, which is always liable to damage from late spring frosts. After the plants have made growth the straw may be scattered on the ground around the plants to conserve moisture and also to keep the fruit clean.

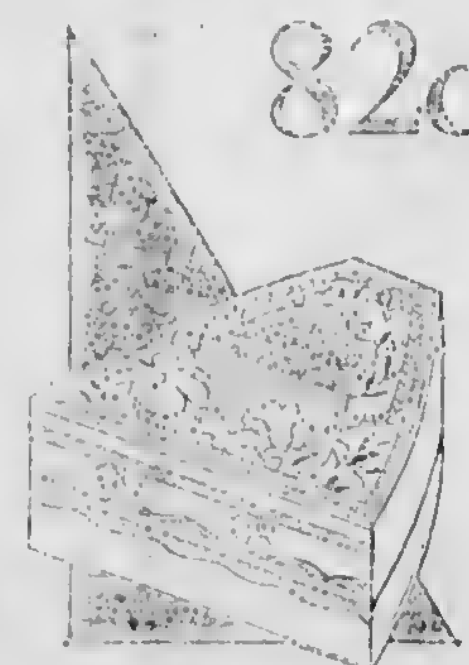

Artificial watering in dry seasons is distinctly beneficial, where water may be easily obtained, as it increases the crop and maintains the size of the fruit for a longer period.

R. M. Wilson,
Dominion Experimental Farm,
Indian Head, Saskatchewan.

"Damaged Lives"**For "SPRINGTIME APPETITES"**

RIGHT now, when everybody's tired of monotonous winter foods, change to crispness! Try a bowl of crisp Kellogg's Corn Flakes with milk or cream, for breakfast. See how keen and fit you feel.

Kellogg's are rich in energy — easy to digest. Ideal for the children's supper. Always oven-fresh and flavor-perfect — kept so by the heat-sealed inner WAXTITE bag. Made by Kellogg in London, Ontario.

Kellogg's**FOR CRISPNESS****News Notes**

The Vancouver team arrived here from Lethbridge Wednesday morning.

LOST — Nickel-plated telescope, 6" inches long. Reward for return to Moses Fromm.

Arrange to send the kiddies to the Matinee Monday at 4:15 and see "OLIVER TWIST."

FOR SALE — At a big sacrifice. Two Monarch ranges in splendid condition. One tan, one pale green. Owners desire to install Electric ranges. Call at the Canadian Utilities Office for particulars.

Percheron Club has been requested to make the selection of these mares. For these selected mares the service of the horse will be free, but the owner will be required to pay the transportation charges to and from the Station and also pay board for the mares while there. In return for breeding the mares the Dominion Department of Agriculture receives an option for purchase on all male offspring from this breeding whereas the owners retain all female offspring. If the male offspring are satisfactory to the Department as senior yearlings they will be purchased and placed with horse breeding clubs whose property they will become if used for three successive years. In this manner high quality stallions will be made available to farm horse breeders of the province in larger numbers. As a further extension of the breeding policy it is planned to develop a larger stud of pure bred Percherons at the Lethbridge Station for the production of good males which will later be made available to horse breeders either through sale or through horse clubs.

While a number of good Percheron stallions are owned by breeders in Alberta the breeders have for some time felt the need of a really outstanding horse for the introduction of new blood into their studs. Under the new policy this need will be filled, to a certain extent at least, by Chief Laet, as he is being bred to only selected mares from among the best in the province and this should result in some high class young breeding stock.

Chief Laet is an outstanding individual that would please the eye of any horse man. His breeding leaves nothing to be desired as it is of the best obtainable in the United States. Both his sire, Sir Laet, and his grandsire, Laet, have been twice grand champions at Chicago and have each sired a large number of outstanding horses. His dam, Corcen, owned by the College of Agriculture, East Lansing, Michigan, is an outstanding breeder. In 1933, at nineteen years of age, she had 13 living progeny, five of which were shown at the International Show last fall, and she is again in foal for 1934.

Chief Laet, was shown at Chicago last fall and placed second in a large futurity class though many breeders, particularly Canadians, considered him the best horse because of the superlative quality of his feet and legs. While he is only two years old and for this season at least will not be of service to breeders of grade horses in the community, the benefit of his service will eventually be felt throughout Alberta.

Liberty 4 Star picture Starts Thursday, next. "THE LOST PATROL."

The Idlers left early Thursday morning for their game with Calgary Moose in Calgary on Thursday night.

"IDLERS" lost in Calgary on Thursday night 29-44 by a score but had sufficient margin to win Provincial title. No details have been received.

FOR SALE — The DeLoss Lund Home south of Bank of Montreal on Broadway. For particulars Call at Bank of Montreal. 3A.26.

Rev. H. D. Riggs of New Dayton, spent Sunday afternoon and Monday in Raymond holding services Sunday evening in the United Church, and performing a marriage Monday evening, which is reported elsewhere in this issue.

Mayor Meeks took a load of Veterans to Lethbridge Wednesday afternoon to meet Lord and Lady Bessborough and party. Among those from here were: Sam Dyson, C. D. Compton, L. J. Meheew, L. B. Middleton, B. J. Coombs, W. T. Barratt, and others.

Notice to Parents

Parents are requested to co-operate with officers of the law in keeping boys and girls from riding on their bicycles on the sidewalks. This offence is punishable by law.

From date of this notice, anyone found riding their bicycles on the sidewalks of the Town of Raymond will be prosecuted under the by-law governing this practice.

BY ORDER OF,
E. S. HAWK,
CHIEF OF POLICE

**WEEKLY LETTER**

While the regular editor of this weekly letter is convalescing after a minor operation, his pinch hitter will deal shortly with what he considers the most interesting event of recent date at the Experimental Station. This event was the inauguration of extensive horse breeding work at the Station with the arrival of the Percheron stallion, Chief Laet, under the new breeding policy introduced by the Honourable Mr. R. Weir, Minister of Agriculture for the Dominion.

This new policy, which was first announced a few months ago, was recognition of the fact that there exists at the

present time in Canada a serious shortage of high quality stallions of all breeds. This shortage has become particularly evident with the revival in horse breeding during the past year or two. Other policies previously have been evolved and are still in effect for assisting horse breeders, but none have had the express purpose of producing high quality stallions such as the present policy has.

The important feature of this new policy is that in addition to breeding the pure bred mares at the Station a limited number of selected pure bred mares from breeders in the Province will be bred to this horse. The Alberta Per-
